How to Stop the Planet from Burning

By George Monbiot

The problem:

- We are destroying the planet by burning fossil fuels.
- This releases greenhouse gases, which trap heat and cause the planet to warm.
- The warming planet is causing devastating climate change, including:
 - Rising sea levels
 - More extreme weather events
 - Loss of biodiversity

The solution:

- We need to stop burning fossil fuels.
- We need to switch to renewable energy sources, such as solar and wind power.
- We need to reduce our energy consumption.

How to do it:

- **Invest in renewable energy.** Governments and businesses need to invest in renewable energy projects.
- **Reduce our reliance on fossil fuels.** We need to improve energy efficiency and reduce our use of oil, gas, and coal.
- **Change our lifestyles.** We need to reduce our consumption of goods and services, and switch to more sustainable ways of living.

The benefits:

- Stopping the planet from burning will save lives and livelihoods.
- It will protect the environment and ensure a healthy future for all.
- It will create jobs and boost the economy.

The urgency:

- We need to act now. The longer we wait, the harder it will be to stop the planet from burning.

Join the movement:

- Learn more about climate change and its solutions.
- Get involved in campaigns to stop the burning of fossil fuels.
- Support organizations working to protect the planet.

**Together, we can stop the planet from burning and create a sustainable future for all.
